

### Background and methodology

This profile provides a multi-sector overview of conditions in the Rohingya Camps in Cox's Bazar District, Bangladesh to offer insights on the evolving protection needs of refugees living in the camps. Data for the findings were collected in 33 camps from 25 November - 17 December, 2018 for the fourth round of Settlement and Protection Profiling (SPP) funded by UNHCR and implemented by REACH. Translators Without Borders supported with translating the form into Rohingya.

Primary data were collected through household surveys randomly sampled from shelters located within 33 settlement boundaries. Results of this assessment are generalizable with 95% confidence level and 10% margin of error at the camp level. Key indicators provide contextual and operational findings at the household level. This factsheet presents an analysis of data collected in Camp 24, where 99 households were surveyed.

Data collection began one week after an attempted repatriation to Myanmar, thus some eligible households chose not to participate out of fear of sharing detailed information. This fear may have created a bias towards those respondents who were willing to participate in this assessment. The non-response rate was 5%.

### Demographics

#### Household composition by gender and age

**56%** of individuals are under 18

**79%** of households are women and children

#### Period of arrival<sup>1</sup>

**80%** of households arrived 25 August 2017 or later

#### Household Size

Number of individuals per household:

There is an average of **5.4** individuals reported per household

#### Persons with Specific Needs (PWSN)

% of families with Persons with Specific Needs (PWSN), by need<sup>1</sup>

Separated children	2%	Unaccompanied children	1%
Older person at risk	4%	Person with disability	4%
Older person at risk and children	2%	Single male parent with infants	1%
Serious medical condition	3%	Single female parent	21%
Families with PWSN	34%		

### Key Camp Information

Camp Management Agency	RRRC
Site Management Support Agency	IOM / IOM
Population (individuals) <sup>1</sup>	33,714
Population (families) <sup>1</sup>	7,800
Camp Area	1.18 km <sup>2</sup>
Population density	28,551 individuals/km <sup>2</sup>

1. RRRC/UNHCR population data and key demographical indicators (15 November 2018 dataset)

2. The boundaries and names used on this map do not imply official endorsement or acceptance by the United Nations

### Protection

% of households reporting their perception of the current security situation in the camp:

# Settlement and Protection Profiling - Camp 24

## Round 4

Top five interventions reported as needing to change or improve in order to improve the sense of safety and security in the camps<sup>3</sup>:

- 1 Improved roads/paths 70%
- 2 Advice from UN/NGOs 66%
- 3 Disaster warning systems 38%
- 4 Better camp management 30%
- 5 Increased policing 25%

Top 3 main risks reported to be faced by adult men and women in the camp<sup>3,4</sup>:

Men	Women
43% Kidnapping 1	51% Natural disasters 1
40% Violence within community 2	42% Violence within home 2
39% Natural disasters 3	35% Violence within community 3

Top 3 preferred sources of help reported for various forms of security incidents<sup>5</sup>:

	Involving self or family with persons inside the camps	Involving self or family with persons outside the camp	Witness to security incident within the camps
1	Mahji 87%	Mahji 70%	Mahji 80%
2	CiC 57%	CiC 61%	CiC 62%
3	Army 41%	Army 48%	Army 57%

## Food Security

### Food Assistance

91% of households reported accessing food assistance in month prior to data collection. Of these, the most common sources were<sup>5</sup>:

WHO / Humanitarian	100%
Bangladesh army	6%
Private donations	0%
Other	0%

3. Respondents could give up to three answers  
 4. These results are based on the respondent's subjective perception of risks in the camp, and not the actual number of security incidents  
 5. Respondents could select multiple options

### Consumption-based coping strategies

Top 3 most commonly reported consumption-based coping strategies<sup>5</sup>:

- 1 Borrow food 83%
- 2 Eat less preferred food 50%
- 3 Limit portion size 48%

### Infant nutrition

71% of households with children under 5 reported receiving a supplementary feeding ration for children under 5 in the 30 days prior to data collection

28% of households with children under 5 reported receiving a breast-milk substitute donation since arriving in Bangladesh

## Water Sanitation and Hygiene

### Water Treatment

40% of households reported treating water

11% of households reported using chlorination tablets (Aquatabs)

### Water Sources

% of households reporting the main source of drinking water:

### Hygiene practices

71% of households reported having access to soap

68% of households reported using public latrines as their usual facility for defecation

### Latrines

Top 3 issues reported with latrines<sup>5</sup>:

- 1 Too many people 86%
- 2 Full 37%
- 3 Not clean 35%

# Settlement and Protection Profiling - Camp 24

## Round 4

### 1.2.3 Priority Needs

Top 3 reported first, second and third priority needs<sup>6</sup>:

	First priority need	Second priority need	Third priority need
1	Fuel 40%	Clothing 30%	Clothing 30%
2	Access to food 32%	Access to food 18%	Household/ cooking items 25%
3	Shelter materials 9%	Household/ cooking items 14%	Fuel 11%

### Shelter

**43%** of households reported living in shelters made of bamboo and plastic sheeting

**78%** of households reported living in lockable shelters

**23%** of households reported living in shared shelters

### Non-Food Items (NFIs)

#### Fuel

% of households reporting their main source of fuel:

**95%** of households reported cooking inside their shelter

Top 3 most important forms of assistance reported as needed to address household shelter needs<sup>6</sup>:

1	Fuel	79%
2	Clothing	72%
3	Cooking items	51%

**98%** of households reported receiving NFI kits since arriving in Bangladesh

6. Respondents could give up to three answers

7. Respondents could select multiple options

### Health

Top 3 reported concerns about healthcare in the camp<sup>6</sup>:

1	Treatment unavailable	70%
2	Supplies unavailable	68%
3	Crowded	26%

### Communication with Communities

#### Sources of information

Top 3 reported preferred methods of communication<sup>6</sup>:

1	Face-to-face	94%
2	Phone call	68%
3	Loudspeakers	58%

### Site Management

**5%** of households reported they face barriers in accessing assistance in the camps. Of these households, the most common assistance types that households face barriers accessing are<sup>7</sup>:

1	NFIs	100%
2	Food	60%
3	Shelter	20%

### Education

**89%** of households reported they are satisfied with the education available in the camps

Top 3 education priorities reported for children<sup>6</sup>:

1	Improved curriculum	58%
2	Better teachers	58%
3	Religious education	37%
