<b>Detailed dissemination plan included in Annex 1</b>	X	<b>Yes</b>	<input type="checkbox"/> No
<b>General Objective</b>	Provide a strong evidence base of information on multi-sectoral humanitarian needs of affected populations in Borno, Adamawa and Yobe (BAY) States of north-east Nigeria and inform multi-sector humanitarian programming for 2020.		
<b>Specific Objective(s)</b>	<ul style="list-style-type: none"> <li>• Provide a comprehensive evidence base of multi-sectoral needs, coping capacity and overall well-being among conflict-affected population in the BAY States, including: <ul style="list-style-type: none"> <li>○ Internally Displaced Persons (IDPs) residing either in formal/informal camp settings or within host communities;</li> <li>○ Returnees including returning IDPs and returning Nigerian refugees;</li> <li>○ Non-displaced populations;</li> <li>○ Populations residing in Hard-to-Reach areas (<u>contextual and secondary information</u> from REACH “monitoring of hard-to-reach areas” activity).</li> </ul> </li> </ul> Provide robust evidence of needs at the time of the assessment as well as projected evolution of those needs to adequately and timely inform and support the key Humanitarian Project Cycle (HPC) milestones for 2020 (Humanitarian Needs Overview and update of the multi-year Humanitarian Response Plan)		
<b>Research Questions</b>	<ul style="list-style-type: none"> <li>• What are the priority multi-sectoral humanitarian needs of the crisis-affected population, and how do these vary between geographical locations, population groups and household profiles?” [inter-sectoral analysis]</li> </ul>		

	<ul style="list-style-type: none"> <li>• What are the characteristics and vulnerabilities of the households?</li> <li>• What are the causes and triggers of household displacement, and movement intentions?</li> <li>• What are the nutrition challenges experienced by small children and mothers?</li> <li>• What are the challenges of accessing health services for households and what is the vaccination status of children?</li> <li>• What are the issues related to water quantity and use, hygiene practices, menstrual cycle management and access to sanitation for households?</li> <li>• What are the issues related to shelter and NFIs for households?</li> <li>• What are the issues related to food quantity and access, availability of firewood/fuel and practices of agriculture for households?</li> <li>• What are the issues related to household livelihoods and access to essential public infrastructure?</li> <li>• What are the issues related to access to education in the household?</li> <li>• What are the issues related to safety and security, legal documentation and movement restrictions for households?</li> <li>• How is the access to child- and woman-protection services in the area, and what are the issues related to mental health in the households?</li> <li>• What are the issues related to access to information and assistance? What are the specific issues related to protection mainstreaming?</li> <li>• What are the environmental and security challenges experienced in the accessible communities?</li> <li>• What are the challenges related to accessing services and infrastructure in the accessible communities?</li> </ul>																				
<b>Geographic Coverage</b>	<i>Primary data collection will cover all accessible areas in Borno, Adamawa and Yobe States in North-east Nigeria.</i>																				
<b>Secondary data sources</b>	<p><i>Secondary sources used for this research cycle will include but not limited to:</i></p> <ul style="list-style-type: none"> <li>• <b>Population estimates:</b> <ul style="list-style-type: none"> <li>○ <i>Vaccination Tracking System (VTS) population dataset;</i></li> <li>○ <i>IOM DTM datasets:</i> <ul style="list-style-type: none"> <li>▪ <i>Returnee dataset round XXVI</i></li> <li>▪ <i>IDP Site assessment dataset round XXVI</i></li> <li>▪ <i>IDP Location assessment dataset round XXVI</i></li> </ul> </li> <li>○ <i>Triangulation using REACH 2018 MSNA KI dataset</i></li> </ul> </li> <li>• <b>Humanitarian needs:</b> <ul style="list-style-type: none"> <li>○ <i>Previous REACH Nigeria assessments</i></li> <li>○ <i>Sectoral-specific assessments accessed by REACH or gathered through the secondary data review from sectors</i></li> </ul> </li> </ul> <p><i>Any other relevant humanitarian, journalistic, academic study on humanitarian needs in North-east Nigeria as needed</i></p>

## 2. Rationale

### 2.1. Rationale

Following ten years of conflict across the Lake Chad region, North East Nigeria continues to experience significant humanitarian needs, as well as increasing access challenges. The 2019 Humanitarian Needs Overview (HNO) identified 7.1M individuals in the three States of Borno, Adamawa and Yobe (collectively, the “BAY” states) to be in need of humanitarian assistance. Out of those, a quarter are internally displaced persons, the majority of whom are extremely vulnerable and displaced in over-crowded locations in Borno State. Furthermore, humanitarian actors continue to have limited capacity to identify the scale of the needs of populations residing in areas outside of the relatively-secure LGA capitals, and even less access to deliver life-saving aid in such hard-to-reach areas.

In light of such challenges, a comprehensive, evidence-based overview of the needs of populations in Northeast Nigeria is vital. To date, efforts made to inform the humanitarian response are either lacking in coordination and information sharing, too localized to provide comprehensive evidence to inform humanitarian response planning efforts, or lack the analytical capacity to identify trends over time and space due to the use of non-harmonized methodologies, tools, and implementation intervals.

Following the implementation of the first multi-sectoral needs assessment (MSNA) in 2018 facilitated by REACH with the support of the United National Office for the Coordination of Humanitarian Affairs (OCHA) and its Inter-Sector Working Group (ISWG), in 2019 a comprehensive MSNA will be implemented to identify, update and compare multi-sectoral needs across population groups affected by the protected crisis and over all accessible areas in the three North-East states. This assessment aims to support evidence-based planning and decision-making by humanitarian actors in Nigeria and, more specifically, aims to inform the 2020 HNO and the update of the current multi-year Humanitarian Response Plan (HRP).

## 3. Methodology

### 2.1. Methodology overview

In coordination with various humanitarian inter-sectoral, sectoral, and coordination groups, REACH will facilitate a multi-sectoral household survey, covering the three states most affected by the conflict in the Northeast: Borno, Yobe and Adamawa states. As the aim of the MSNA is to inform the HNO and HRP, all relevant sectors are engaged for feedback into the sector-specific indicators to inform gaps in response, severity of the crisis, vulnerabilities and other essential information components of the analytical framework.

The primary data collection will use a sampling frame that will give representative data with a 95% level of confidence and a 10% margin of error at the LGA-level overall (not by population group). However, following the cluster and population group selection method within each LGA, the data aggregated to the State level will be representative for each population group. The primary data collection will cover all accessible areas in at least 61 out of the 65 LGAs of the north-east. Finally, a purposive sample of key informants in each cluster visited will be assessed to provide more granular information, as well as information on environmental risk and damage and access to services infrastructure at the community level, compared to the household survey. This will help the analysis of impact on services and access to humanitarian assistance, as well as getting a community-level understanding of pre-existing vulnerabilities.

### 2.2. Population of interest

Three distinct population groups are targeted by the primary data collection within the MSNA research cycle:

- Non-displaced populations – those who have never been displaced due to the crisis;

- Returnees – those that have been displaced but have since returned to their areas of origin (not including regular movements such as pendular/seasonal migrations);
- Internally displaced peoples – those who have been displaced and are still displaced in their primary or in a secondary displacement location.

As much as possible, the MSNA final analysis and outputs will also try to incorporate contextual and secondary data regarding populations residing in hard-to-reach areas, as this population group is also a core group included in the HPC milestone documents. Compared to the 2018 REACH MSNA, where a secondary data collection had taken place to identify needs of populations in some hard-to-reach areas in Borno state, this contextual and secondary information will stem from another REACH assessment which monitors multi-sectoral needs in hard-to-reach areas.

The MSNA will aim to give information of all accessible areas - inaccessible areas are identified on a map by field officers familiar with the areas as well as using key documents from the Access Working Group and other security-related documents, and were excluded from sampling for the household surveys. In Borno State, there are severe access restrictions in many areas, meaning that results will not be representative of populations in hard to reach areas. Nearly all LGA capitals and some major towns are considered accessible however, as well as towns and settlements along secure major roads. Several LGAs in Southern Borno are the exception as they are considered accessible even in areas outside of the LGA capital. For Yobe State, only Geidam, Yunusari, Gulani and Gujba LGAs are considered to have access restrictions, while the rest are completely accessible. These four LGAs will be restricted to the LGA capital, and some settlements along the main roads. For Adamawa State, nearly all LGAs are considered completely accessible, with the exceptions of Madagali, Michika, Mubi North and Maiha in the far north-east of the state along the Cameroon border.

Table 1. LGAs accessible/ not accessible

	Completely Accessible	Partially Accessible	No Access
<b>Borno State</b>	Bayo, Hawul, Kwaya Kusar, Shani, MMC, Jere	Mobbar, Guzamala, Nganzai, Bama, Dikwa, Gwoza, Ngala, Damboa, Gubio, Kaga, Konduga, Mafa, Magumeri, Monguno, Askira/Uba, Chibok, Biu	Abadam, Kala-Balge, Kukawa, Marte
<b>Yobe State</b>	Bade, Bursari, Jakusko, Damaturu, Fika, Fune, Nangere, Potiskum, Karasuwa, Machina, Nguru, Yusufari	Gujba, Gulani, Yunusari, Tarmua	Geidam
<b>Adamawa State</b>	Girei, Hong, Mubi South, Song, Demsa, Gombi, Guyuk, Lamurde, Numan, Shelleng, Yola North, Ganye, Jada, Mayo-Belwa, Toungo, Fufore, Yola South	Madagali, Maiha, Michika, Mubi North	

### 2.3. Secondary data review (outline key bibliography/sources you will use and for what). [One to two paragraphs]

Secondary sources used for this research cycle will include but not limited to:

- **Population estimates:**
  - Vaccination Tracking System (VTS) population dataset;
  - IOM DTM datasets:
    - Returnee dataset round XXVI
    - IDP Site assessment dataset round XXVI

- IDP Location assessment dataset round XXVI
  - Triangulation using REACH 2018 MSNA KI dataset
- **Humanitarian needs:**
  - Previous REACH assessments
  - Sectoral-specific assessments accessed by REACH or gathered through the secondary data review from sectors
  - Any other relevant humanitarian, journalistic, academic study on humanitarian needs in North-east Nigeria.

An SDR is completed in coordination with the Information Management Unit within OCHA, including the various sectoral Information Management Officers (IMOs) of each sector to ensure that as many secondary sources as possible are accessed.

## 2.4. Primary Data Collection

### MSNA - Key Informant Data Collection

A short Key Informant interview form is applied to complement the household level data at the cluster level. This intent is to capture limited settlement level information on flooding and as well as accurate population figures for our survey locations. The key informant will be the community or camp leader of that site.

### MSNA - Household level data collection

Data collection will take place for roughly five weeks, beginning June 17th and ending July 26<sup>th</sup> at the latest. This data collection will be conducted by REACH teams in addition to other partners – such partners providing “full” data collection resources (enumerators, cars, technical equipment) include Catholic Relief Services (CRS), Malteser International, and PLAN International. Other partners are providing technical or ad-hoc support such as ACTED and Premiere Urgence International.

REACH “supervisors” including field managers, senior field officers, field officer, will be present in each “hub” in the three states, to coordinate the data collection from partners and to conduct data collection in locations where any other partner would not be present. In areas covered by partners, those partners will be responsible for providing the number of cars and enumerators required to reach the target in the LGAs covered. In other areas covered by REACH, there will be at least 2 teams of 15 enumerators each within each of the three states. In locations that are only accessible by UNHAS helicopters (Borno state), field officers will train and work with teams of at least 10 enumerators who will be locally identified and contracted.

### Sampling

A stratified, two-stage cluster sampling design will be utilized. The LGAs are the strata, while the primary sampling unit is defined as the settlement/camp, and the secondary sampling unit is the households within those locations. Each primary sampling unit is considered to be a location for one specific population group. This means that the same community with both IDPs, and non-displaced populations would be considered two separate units. Sampling is conducted at a 95% confidence level with a 10% margin of error, adding a 10% sample buffer to account to non-response and other errors in the survey. Each cluster has a minimum size of 5 surveys.

Two rounds of sampling have been conducted for the primary sampling units (PSUs): 1) probability proportional to size sampling of clusters at the LGAs level, irrespective of population group and 2) a “top-up” sampling of additional clusters to ensure the minimum sample for each population group has been reached within each State. Additionally, a set of “reserve” clusters were sampled in the event that too many locations were found to be abandoned or inaccessible in a given LGA. For each, 5 such reserve clusters are selected to account for deviation from initial ones.

There are information gaps on which settlements have non-displaced or returnee populations, so likely some selected clusters may not have the intended population group present. In such instances, teams will continue with data collection and plans to correct incomplete targets, if necessary, during wrap-up activities at the end of data collection. In total, 9,494 households were sampled in 1,114 settlements/clusters. As noted above, this ensures a level of representativeness of the data at the lowest level overall in each LGA with 95% confidence interval and 10% margin of error. The two-staged method of sampling will also allow for representativeness at the State level for each population group; confidence intervals and margins of error will be determined at the analysis stage.

The method preferred for household selection during data collection in each of the clusters will be through GPS points, which will be pre-determined and included in phones for enumerators and supervisors prior to starting data collection.

Once the clusters have been randomly selected in each strata through the two-stage process mentioned above, they visualized on ArcGIS software, and buffers were created around each (usually 250m buffers, although in some examples such as formal camps the buffer was extended to the actual boundaries of the camp. When the original buffer was excluding too big a share of the camp, the objective was to try and not hamper the probability of a significant part of the camp population to be surveyed). Within those buffers, survey points were randomly generated, more than the expected survey number to account for potential empty spaces, wrong population group, empty household at the time of visit, etc.

During the data collection, enumerators are expected to reach those surveys points to conduct interviews, and to follow data collection protocols in the event where the interview was not possible. Several cases are identified:

- If the HH is present and correctly sampled, but refuses to give consent, the interview is concluded and the household will be counted as part of the non-responses.
- If the HH is not present, the enumerators should interview the closest HH in the right direction.
- If the HH is present but not from the right population group, the enumerators should survey the closest HH corresponding to the right population group.
- If the expected population group cannot be found in the cluster, the enumerators should select another cluster, this cluster will be left aside and if it is the case for more than 2 clusters, reserve clusters will be selected;
- If the cluster is inaccessible for any reason (no access from local community given, insecurity, terrain, etc.), the enumerators should select another cluster, this cluster will be left aside and if it is the case for more than 2 clusters, reserve clusters will be selected;

## 2.5. Data Processing & Analysis

- Analytical framework: REACH will use, as much as possible, the updated analytical framework developed by the Joint Inter-sectoral Analysis Group (JIAG) at the global level. Using this analytical framework within the MSNA, in parallel to OCHA and the sector partners using this updated framework for the HPC key milestone documents, will ensure that data from the MSNA will most adequately respond to the needs of the humanitarian community.
- Data entry and cleaning process: As network availability allows, data from the primary data collection will be cleaned uploaded and reviewed on a daily basis, by the REACH data & assessment team sitting in Maiduguri. This team alongside field level supervisors will give feedback to field teams on a daily basis, and by “roving” REACH team members, whose primary goal will be to follow up on data quality, reaching targets and following deadlines. Once the data collection is complete, REACH will ensure that the final, clean and anonymised dataset will be made available to all relevant partners within one week of the end of data collection.
- Data analysis process: REACH will primarily conduct the data analysis from the clean dataset based on the JIAG analytical framework. Sectoral and inter-sectoral analysis will be performed based on discussions with sectors to determine sectoral composite indicators and thresholds. There will also be a crucial second time in the analysis process: the **joint analysis** with sectors and partners. This will be done in two steps:
  - First, input will be requested on the analysis from the small team of data collection partners and key stakeholders from OCHA and sector coordination;

- Secondly, REACH and OCHA will facilitate **Joint Analysis Workshops** gathering a large audience within the humanitarian community. These workshops will be focusing on selected inter-sectoral topics to try and jointly contextualize results from the data analysis based on partners experiences and secondary data.

## 4. Roles and responsibilities

Table 3: Description of roles and responsibilities

<b>Task Description</b>	<b>Responsible</b>	<b>Accountable</b>	<b>Consulted</b>	<b>Informed</b>
Research design	Assessment Officer	Country coordinator	HQ Research team	OCHA
Supervising data collection	Field Manager	Assessment Officer	HQ Research team	OCHA
Data processing (checking, cleaning)	Database Specialist	Assessment Officer / GIS Officer	HQ Data Unit	OCHA
Data analysis	Assessment Officer, GIS Officer	Country Coordinator	HQ Data Unit	OCHA, Sectors
Output production	Assessment Officer	Country coordinator	HQ Reporting team	OCHA
Dissemination	Assessment Officer	Country Coordinator	HQ Comms	OCHA, partners, donor
Monitoring & Evaluation	Assessment Officer	Country Coordinator	HQ Research team	
Lessons learned	Assessment Officer	Country Coordinator	HQ Research team	partners

**Responsible:** the person(s) who executes the task

**Accountable:** the person who validates the completion of the task and is accountable of the final output or milestone

**Consulted:** the person(s) who must be consulted when the task is implemented

**Informed:** the person(s) who need to be informed when the task is completed

## 5. Data Analysis Plan – See Annex 2

## 6. Data Management Plan

Detailed Data Management Plan is available upon request.

## 6. Monitoring & Evaluation Plan

- Please complete the M&E Plan column in the table and use the corresponding Tools in the Monitoring & Evaluation matrix to implement the plan during the research cycle.

IMPACT Objective	External M&E Indicator	Internal M&E Indicator	Focal point	Tool	Will indicator be tracked?
Humanitarian stakeholders are accessing IMPACT products	Number of humanitarian organisations accessing IMPACT services/products  Number of individuals accessing IMPACT services/products	# of downloads of x product from Resource Center	Country request to HQ	User_log	<input checked="" type="checkbox"/> Yes
		# of downloads of x product from Relief Web	Country request to HQ		<input checked="" type="checkbox"/> Yes
		# of downloads of x product from Country level platforms	Country team		<input type="checkbox"/> Yes
		# of page clicks on x product from REACH global newsletter	Country request to HQ		<input checked="" type="checkbox"/> Yes
		# of page clicks on x product from country newsletter, sendingBlue, bit.ly	Country team		<input checked="" type="checkbox"/> Yes
		# of visits to x webmap/x dashboard	Country request to HQ		<input type="checkbox"/> Yes
IMPACT activities contribute to better program implementation and coordination of the humanitarian response	Number of humanitarian organisations utilizing IMPACT services/products	# references in HPC documents (HNO, SRP, Flash appeals, Cluster/sector strategies)	Country team	Reference_log	<i>HNO/HRP for Nigeria 2020</i> <i>Donor strategy documents</i> <i>Sector strategy documents</i> <i>Any other relevant strategic document</i> <i>Any other relevant assessment or research study</i>
		# references in single agency documents			
Humanitarian stakeholders are using IMPACT products	Humanitarian actors use IMPACT evidence/products as a basis for decision making, aid planning and delivery	Perceived relevance of IMPACT country-programs	Country team	Usage_Feed back and Usage_Survey template	
		Perceived usefulness and influence of IMPACT outputs			
		Recommendations to strengthen IMPACT programs			
		Perceived capacity of IMPACT staff			

	Number of humanitarian documents (HNO, HRP, cluster/agency strategic plans, etc.) directly informed by IMPACT products	Perceived quality of outputs/programs			<i>E.g. Usage survey to be conducted at the end of the research cycle related to all outputs, targeting at least 20 partners</i>
		Recommendations to strengthen IMPACT programs			
<b>Humanitarian stakeholders are engaged in IMPACT programs throughout the research cycle</b>	Number and/or percentage of humanitarian organizations directly contributing to IMPACT programs ( <i>providing resources, participating to presentations, etc.</i> )	# of organisations providing resources (i.e.staff, vehicles, meeting space, budget, etc.) for activity implementation	Country team	Engagement_log	<b>x Yes</b>
		# of organisations/clusters inputting in research design and joint analysis			<b>x Yes</b>
		# of organisations/clusters attending briefings on findings;			<b>x Yes</b>

## ANNEX 1: DISSEMINATION PLAN

In order to develop a comprehensive dissemination plan, country focal points and relevant staff from the team will need to answer a few key questions about the selected finding or product. Don't be discouraged if at first you cannot fill-out every component of this planning tool, as this tool and related questions should be considered as a working document to help you develop and modify your strategy, as your dissemination efforts and priorities evolve. For example, it will be rather straight forward to identify your stakeholders at project design phases, but you will be able to provide a precise message only once the findings of the assessments have been finalised. This is why you may want to work back and forth between questions as your thinking develops, as the context changes and as findings from your work are finalised.

The design of a dissemination plan should be a team effort and thus key staff (both national and international) engaged in the related IMPACT program should provide inputs, as well as colleagues from other departments, notably those who are involved in project development and resource mobilisation. The dissemination plan should be prepared prior to the project kick-off meeting and presented during the kick-off meeting. The plan will then be validated by IMPACT HQ, for implementation at country, regional and global level. The plan should however be considered as a living document, and if necessary should be modified once the assessment ToRs are refined, once the assessment findings and messages are finalised and so forth. Changes to the plan must be communicated from country teams to IMPACT HQ for final validation.

**A. Key events and planning dates** of the broader humanitarian community, which should be taken into consideration when developing the dissemination plan:

	Internal Planning dates	External Milestones
February	MSNA workshop in GVA: lessons learned and planning for 2019	29 Jan-1 Feb: Publication of 2019 HNO and 2019-2021 HRP/"HRS": Humanitarian Response Strategy
March	Initial planning with OCHA/ISWG	
April	Selecting indicators with sectors	
May	Selecting indicators with sectors + outreach to partners	
June	Training and data collection	ISWG retreat + presentation of HNO/HRP new templates
July	Data collection	
August	Data analysis / Sharing with sectors / JAWs	JAWs / HNO workshops
September	Working on outputs / (Inter-)Sectoral support	HNO workshops
October	Working on outputs / (Inter-)Sectoral support	Finalising HNO – HRP workshops
November	Dissemination – Attending HRP meetings?	2020 HNO publication – HRP workshops
December	Dissemination – Attending HRP meetings?	Finalising HRP
January 2020		HRP update publication

**B. Dissemination plan: to be completed post data collection**

#	Products	Message	Stakeholders	Means of dissemination	Purpose	Responsible	Timeframe
<b>Name of program (and related project codes)</b>							
<b>Program goal:</b> Ex. Inform the shelter, WASH and education response in Somalia							
1.	Ex. Education, Shelter and WASH Fact Sheet	Ex. Xx% of IDPs live in sub-standard shelters → recommendation is for the shelter Cluster to develop a shelter upgrade strategy prior to the rainy season	Ex. Somalia humanitarian community	Ex. General Product Mailing (NGO consortium and HCT participants)  Ex. Presentation of findings at next HCT meeting	<b>Inform Action:</b> Inform humanitarian community to influence the response	REACH focal point	By day/month/year (3 months prior to the rainy season)
			Ex. Cluster partner agencies and decision makers	Ex. Cluster Mailing (Education, Shelter and WASH) and presentation of findings at next cluster meeting			

# IMPACT Initiatives

							of cluster strategies)
		Ex. Overall shelter conditions in Somalia have deteriorated, etc.	Ex. Humanitarian community at large	Ex. Website Dissemination (Relief Web & REACH Resource Centre)	<b>Raise Awareness</b>	IMPACT HQ	
		Ex. Xx% of IDPs live in sub-standard shelters → recommendation is for the donor community to earmark additional funds for shelter interventions	Ex. Donor community (with focus on ECHO, DFID)	Ex. Organisation of findings presentation for key donors  Ex. Dissemination of fact sheet via e-mail to all donors	<b>Build Understanding:</b> ensure donors understand the needs, which could potentially lead to influencing their planning	REACH focal point	By day/month/year (1 months prior to the humanitarian appeal)

## ANNEX 2: DATA ANALYSIS PLAN – KEY INFORMANT SURVEY

Research questions	IN #	Data collection method	Indicator group / sector	Indicator / Variable	Questionnaire Question	Instructions	Questionnaire Responses
N/A	A.0.1	KI Interview	Metadata	Metadata	What is the enumerator code?	Text	Text
	A.0.2	KI Interview	Metadata	Metadata	In what State is this survey taking place?	Select one	Dropdown list
	A.0.3	KI Interview	Metadata	Metadata	In what LGA is this survey taking place?	Select one	Dropdown list
	A.0.4	KI Interview	Metadata	Metadata	In what ward is this survey taking place?	Select one	Dropdown list
	A.0.5	KI Interview	Metadata	Metadata	What is the cluster ID of this survey?	Select one	Dropdown list
	A.0.6	KI Interview	Metadata	Metadata	Take the GPS coordinates of this location (please wait to have a precision of less than 10 meters)	GPS	GPS
	A.0.7	KI Interview	Metadata	Metadata	Is the settlement where it was expected?	Select one	1. Settlement was where expected, GPS accurate 2. Settlement was far from where expected (>0.5 km), GPS not accurate 3. Settlement was absent, or abandoned 98. No response 99. Don't know
	A.0.8	KI Interview	Metadata	Metadata	How were you able to access this settlement?	Select one	1. Not accessible 2. By motorcycle / keke 3. By car / minivan 97. Other

	A.0.9	KI Interview	Metadata	Metadata	<p>We are from REACH / PLAN / CRS / Malteser International, and we are conducting this assessment to understand the needs of people in the affected communities in the North-East of Nigeria. We share our results with humanitarian organizations so they can better plan and organize their responses. Today, we are visiting your community to do an assessment and to ask you a few questions about the populations residing it, environmental issues and access to services and key infrastructure. You will not receive anything for participating, and if you choose not to participate it will not affect your ability to receive humanitarian services. The information you are providing in this survey will remain protected and anonymous. The interview will take about 15 minutes. Do you agree to participate?</p> <p>[If Key informant is here and willing to participate, select YES. If Key informant is not here or is not willing to participate, select NO. Look for another key informant in the community.]</p>	Select one	<p>1. Yes 2. No</p>
	A.1.1	KI Interview	KI Information	KI Information	What is the name of the key informant?	Select one	Text
	A.1.2	KI Interview	KI Information	KI Information	Are you the bulama, camp leader or community leader?	Select one	<p>1. Bulama 2. Camp leader 3. Community leader 97. Other</p>
	A.1.3	KI Interview	KI Information	KI Information	What is the phone number of the key informant?	Text	Text
	A.1.4	KI Interview	KI Information	KI Information	What is the name of this settlement?	Text	Text
	A.2.1	KI Interview	Demographics	Demographics	What is the TOTAL number of households living in {settlement}, including IDPs, non-displaced, and returnees?	Integer	integer
	A.2.2.	KI Interview	Demographics	Demographics	What is the total number of IDP households?	Integer	integer
	A.2.2	KI Interview	Demographics	Demographics	What is the total number of non-displaced households?	Integer	integer

	<b>A.2.2.</b>	<i>KI Interview</i>	<i>Demographics</i>	<i>Demographics</i>	<i>What is the total number of returnee households?</i>	<i>Integer</i>	<i>integer</i>
<b>What are the environmental and security challenges experienced in the accessible communities?</b>	<b>A.3.1</b>	<i>KI Interview</i>	<i>Environment &amp; Security</i>	<i>% of communities exposed to explosive hazards, and exposure profile</i>	<i>Have you observed/are aware of any people in your community who have been injured or killed by explosive items in the last 3 months?</i>	<i>Select one</i>	<i>1. Yes 2. No 98. No response 99. Don't know</i>
	<b>A.3.2</b>	<i>KI Interview</i>	<i>Environment &amp; Security</i>	<i>% of communities exposed to explosive hazards, and exposure profile</i>	<i>What group of people were exposed to the explosive items?</i>	<i>Select multiple</i>	<i>1. Men 2. Women 3. Adolescent boys (age 12-17 years) 4. Adolescent girls (age 12-17 years) 5. Boys (age &lt;12 years) 6. Girls (age &lt;12 years) 97. Other 98. No response 99. Don't know</i>
	<b>A.3.3</b>	<i>KI Interview</i>	<i>Environment &amp; Security</i>	<i>% of communities exposed to explosive hazards, and exposure profile</i>	<i>If yes, do you know what these persons were doing at the time of the accident?</i>	<i>Select multiple</i>	<i>1. Moving / traveling from one place to another / going to work 2. When working on the farms 3. When collecting firewood 4. Collecting scrap metal 5. Children while playing 6. Going to school, or at school 7. Attempt by community member to remove explosive device 97. Other 98. No response 99. Don't know</i>
	<b>A.3.4</b>	<i>KI Interview</i>	<i>Environment &amp; Security</i>	<i>% of communities exposed to explosive hazards, and exposure profile</i>	<i>If yes, what is the type of land mainly contaminated by explosive items?</i>	<i>Select multiple</i>	<i>1. Agricultural land 2. Hospital 3. School 4. Residential areas / homes 5. Other public space/area 6. Other public buildings 98. No response 99. Don't know</i>

	<b>A.4.1</b>	KI Interview	Environment & Security	% of communities affected by environment damage	During the last rainy season, did flooding occur in this location which resulted in the loss of shelter, loss of livelihoods assets, or forced displacement of people?	Select one	1. Yes, multiple times 2. Yes, only once 3. No 98. No response 99. Don't know
	<b>A.4.2</b>	KI Interview	Environment & Security	% of communities affected by environment damage	How many households shelters were abandoned by the flooding, the last time it flooded?	Select one	1. Few households affected(less than 1/3 of households) 2. Some households affected (greater than 1/3 but less than 2/3 of households) 3. Most households (greater than 2/3 but not all households) 4. All households affected
	<b>A.4.3</b>	KI Interview	Environment & Security	% of communities affected by environment damage	How severe was the flooding, the last time it flooded?	Select one	1. Lasted one day only 2. Lasted 2-3 days 3. Lasted between 4 days and a week 4. Lasted greater than a week, but less than a month 5. Lasted greater than a month 98. No response 99. Don't know
	<b>A.4.4</b>	KI Interview	Environment & Security	% of communities affected by environment damage	During the past 3 months, did fire occur in this location which resulted in the loss of shelter, loss of livelihoods or agricultural assets, or forced displacement of people?	Select one	1. Yes, multiple times 2. Yes, only once 3. No 98. No response 99. Don't know
	<b>A.4.5</b>	KI Interview	Environment & Security	% of communities affected by environment damage	How many households shelters were abandoned/lost due to the fire, last time it occurred?	Select one	1. Few households affected(less than 1/3 of households) 2. Some households affected (greater than 1/3 but less than 2/3 of households) 3. Most households (greater than 2/3 but not all households) 4. All households affected
<b>What are the issues related to children protection and mental health in the</b>	<b>A.5.1</b>	KI Interview	Environment & Security	% of communities including children separated from their parents / caregivers	Are there any children in the community who are separated from their parents/caregivers ?	Select one	1. Yes 2. No 98. No response 99. Don't know

<b>accessible communities?</b>	<b>A.5.2</b>	<i>KI Interview</i>	<i>Environment &amp; Security</i>	<i>% of communities including children separated from their parents / caregivers</i>	<i>What is the main living arrangement for UNACCOMPANIED children in the community?</i>	<i>Select one</i>	<i>1. Living alone or with a group of children 2. Living in an orphanage or a collective centre 3. Living with adult caregivers 97. Other 98. No response 99. Don't know</i>
	<b>A.5.3</b>	<i>KI Interview</i>	<i>Environment &amp; Security</i>	<i>% of communities with children experiencing psychosocial distress</i>	<i>Have you noticed any changes in the behaviour of children in the community?</i>	<i>Select one</i>	<i>1. Yes 2. No 98. No response 99. Don't know</i>
	<b>A.5.4</b>	<i>KI Interview</i>	<i>Environment &amp; Security</i>	<i>% of communities with children experiencing psychosocial distress</i>	<i>If yes, which of the following behaviours have you observed amongst children in the community?</i>	<i>Select multiple</i>	<i>1. Unwillingness to go to school 2. Difficulties with sleep 3. Isolation 4. Less willingness to help parents/caregivers 5. Sadness 6. Violence against other children 7. Violent behaviour in general in the community 8. Eagerness to join armed/vigilante group 9. Substance abuse 10. Committing crime 11. Engaging in high risk sexual behaviour 97 Other 98. No response 99. Don't know</i>
	<b>A.5.5</b>	<i>KI Interview</i>	<i>Environment &amp; Security</i>	<i>% of HHs with children experiencing psychosocial distress</i>	<i>If yes, do you think the behaviour changes identified are more prevalent amongst girls or amongst boys?</i>	<i>Select one</i>	<i>1. More frequent among boys 2. More frequent among girls 98. No response 99. Don't know</i>
<b>What are the challenges related to accessing services and infrastructure in the accessible communities?</b>	<b>A.6.1</b>	<i>KI Interview</i>	<i>Access to services &amp; infrastructure</i>	<i>% of HHs with access to functional basic public facilities and infrastructure</i>	<i>Are there facilities providing formal education in this community?</i>	<i>Select one</i>	<i>1. Yes 2. No 98. No response 99. Don't know</i>

<b>A.6.2</b>	<i>KI Interview</i>	<i>Access to services &amp; infrastructure</i>	<i>% of HHs with access to functional basic public facilities and infrastructure</i>	<i>How many education facilities (nursery, primary, and/or secondary) have been affected by the conflict?</i>	<i>Select one</i>	<i>1. Few facilities affected(less than 1/3 of facilities) 2. Some facilities affected (greater than 1/3 but less than 2/3 of facilities) 3. Most facilities (greater than 2/3 but not all facilities) 4. All facilities affected 98. No response 99. Don't know</i>
<b>A.6.4</b>	<i>KI Interview</i>	<i>Access to services &amp; infrastructure</i>	<i>% of HHs with access to functional basic public facilities and infrastructure</i>	<i>Are there health facilities in this community?</i>	<i>Select one</i>	<i>1. Yes 2. No 98. No response 99. Don't know</i>
<b>A.6.5</b>	<i>KI Interview</i>	<i>Access to services &amp; infrastructure</i>	<i>% of HHs with access to functional basic public facilities and infrastructure</i>	<i>How many health facilities have been affected by the conflict?</i>	<i>Select one</i>	<i>1. Few facilities affected(less than 1/3 of facilities) 2. Some facilities affected (greater than 1/3 but less than 2/3 of facilities) 3. Most facilities (greater than 2/3 but not all facilities) 4. All facilities affected 98. No response 99. Don't know</i>
<b>A.6.7</b>	<i>KI Interview</i>	<i>Access to services &amp; infrastructure</i>	<i>% of HHs with access to functional basic public facilities and infrastructure</i>	<i>How many functional community boreholes do you have in you community?</i>	<i>Integer</i>	<i>Integer</i>
<b>A.6.9</b>	<i>KI Interview</i>	<i>Access to services &amp; infrastructure</i>	<i>% of HHs with access to functional basic public facilities and infrastructure</i>	<i>How many official waste disposal sites are operating now in the community?</i>	<i>Integer</i>	<i>Integer</i>
<b>A.6.10</b>	<i>KI Interview</i>	<i>Access to services &amp; infrastructure</i>	<i>% of HHs with access to functional basic public facilities and infrastructure</i>	<i>Are there vehicular access routes open to this area/community for goods and services?</i>	<i>Select one</i>	<i>1. Yes 2. No 98. No response 99. Don't know</i>
<b>A.6.11</b>	<i>KI Interview</i>	<i>Access to services &amp; infrastructure</i>	<i>% of HHs with access to functional basic public facilities and infrastructure</i>	<i>Has humanitarian assistance been able to access this area/community in the past 3 months?</i>	<i>Select one</i>	<i>1. Yes 2. No 98. No response 99. Don't know</i>
<b>A.6.12</b>	<i>KI Interview</i>	<i>Access to services &amp; infrastructure</i>	<i>% of HHs with access to functional basic public facilities and infrastructure</i>	<i>Are there formal justice institutions (courthouse, mobile court system) available in this area / community?</i>	<i>Select one</i>	<i>1. Yes 2. No 98. No response 99. Don't know</i>

	<b>A.6.13</b>	<i>KI Interview</i>	<i>Access to services &amp; infrastructure</i>	<i>% of HHs with access to functional basic public facilities and infrastructure</i>	<i>Are there traditional dispute mechanisms available in this area / community?</i>	<i>Select one</i>	<i>1. Yes 2. No 98. No response 99. Don't know</i>
